JAEDEN HOBSTABLE

OBJECTIVE

As a recent computer Science graduate with a bachelors seeking a challenge to gain practical experience and expand my current skillset. Currently willing to work and learn under a dedicated team and to grow as a software developer.

SKILLS

- Programming Languages: C, C++, Java, Python, JavaScript, HTML
- Database management (MySQL, MongoDB, PHP)
- *CSS*
- *React*
- *GitHub*

EDUCATION

University of Central Florida
Bachelor of Science (B.S.), Computer Science
August 2018 – May 2023

- GPA: 3.27
- Florida Academic Scholar recipient
- Excel Program
- Course Work: Machine learning, Topics in cybersecurity, Object oriented programming, Systems software, Data structures and algorithms

PROJECTS

Backend Developer - Processes of Object-Oriented Programming Project (2022)

- Collaborated with 6 other developers for a MERN app for student's time management.
- Design and tested API endpoints
- Developed simple CRUD operations.

UI - Mangrove (Capstone Project)

- Quickly adapted to an already developed web application in a Linux environment that used docker containers and images.
- Responsibilities were to make the web app more interactive for users.
- Implemented the ability to interact with audio recordings and graphs with a marking system.
- Solved clipping recordings through audio visualizations that can be downloaded through the browser.
- Results when exported are automatically packaged and ready for use rather than having to be created manually.
- Added the ability to download a smaller selected region from an audio sample so that when users put the segment through Frequency Filtering, loading will no longer take hours.

EXPERIENCE

United Against Poverty (Volunteering)
November 2018
Held a volunteering position for united against poverty where I managed a position assisting others to maintain a business by assessing the conditions of products.
